

AppWorks School / 2018 Summer - iOS Class

Remote Assignment - Week 3

Please implement the UI design below. This is a simple log in and sign up page.

- Only consider **iPhone 8** screen size when implemete this app.

- Here is UI requirement, the distance mentioned below use pixel as unit :

AppWorks School label :

top 80 to status bar, horizontally center in super view.

font size 40.0

Segmented Control :

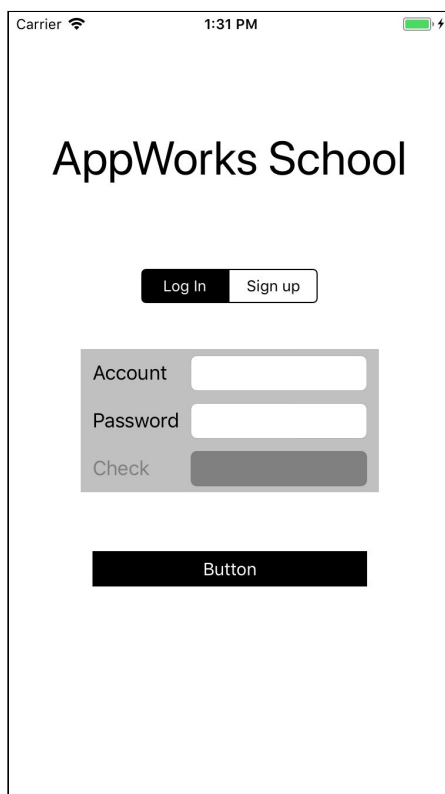

top 70 to AppWorks label, width 150, horizontally center in super view.

Gray View :

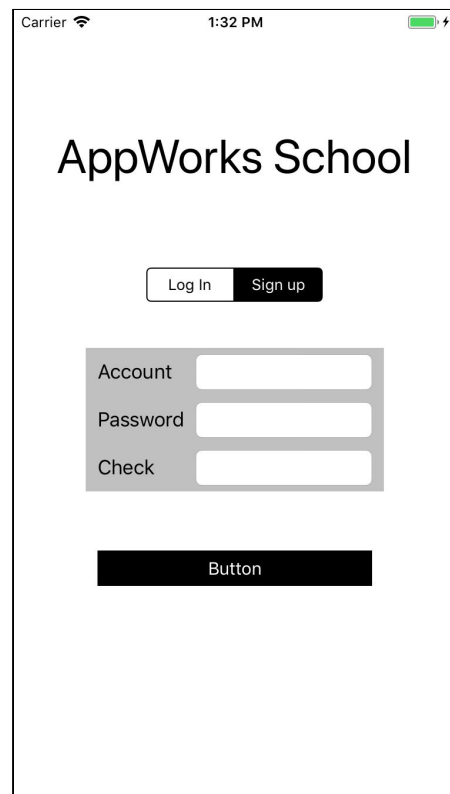

width 255, height 125, top 40 to segmented control, horizontally center in super view.

Button :

width 235, height: 30, top 50 to gray view, horizontally center in super view.

Log in

Sign up

- Functional requirement:

1. Switch to login, the check label and text field should change color and disable. Vice versa.
2. When touch the button, should execute the log in or sign up method. Depend on the segmented control's index.
3. If there is no valid text, you should show relative alert to user. Including empty input, wrong input.
4. In log in method, we only accept account as 'luke@gmail.com' , password as '1234'. Otherwise is invalid info.
5. In sign up method, the account is always valid except empty input. It is valid when the password is equal to the check text, otherwise is invalid.
